

Finep co-funding  
schemes to enhance  
international cooperation  
in research & innovation

# Why to Cooperate?

Knowledge and innovation are increasingly interconnected between organizations from different countries

Competition takes place at the international market level

Global solutions to global issues

# Benefits of International Cooperation

complementary skills

Sharing of ideas and infrastructure

Cost and time reduction

Products and services with higher added value

Access to new markets

# Main Identified Difficulties

Find the partnership

Access to funding opportunities

Short time between the launch of the call and the  
submission date

Converge processes

# How to Improve the Enviroment

Support of common interest projects

Joint events

Exchange of best practices

Capacity Building

# **Coordinated Support of Common Interest Projects**

Innovation component

Technological risk

Mutual benefits

Commercial potential

Companies can't belong to the same economic group

# **Funding Mechanisms**

The support of FINEP covers the entire cycle of STI, from basic research to the development of products, services and processes in companies.

The diagram illustrates five funding mechanisms of FINEP, arranged in two rows. The top row consists of three colored rectangular blocks: dark teal, orange, and purple. Each block contains a yellow-outlined oval with text. The bottom row consists of two colored rectangular blocks: light blue and black. The text in these blocks is centered. At the bottom of the slide, there is a decorative horizontal line with a teal-to-black gradient and a solid orange circle.

**Loans to Companies**

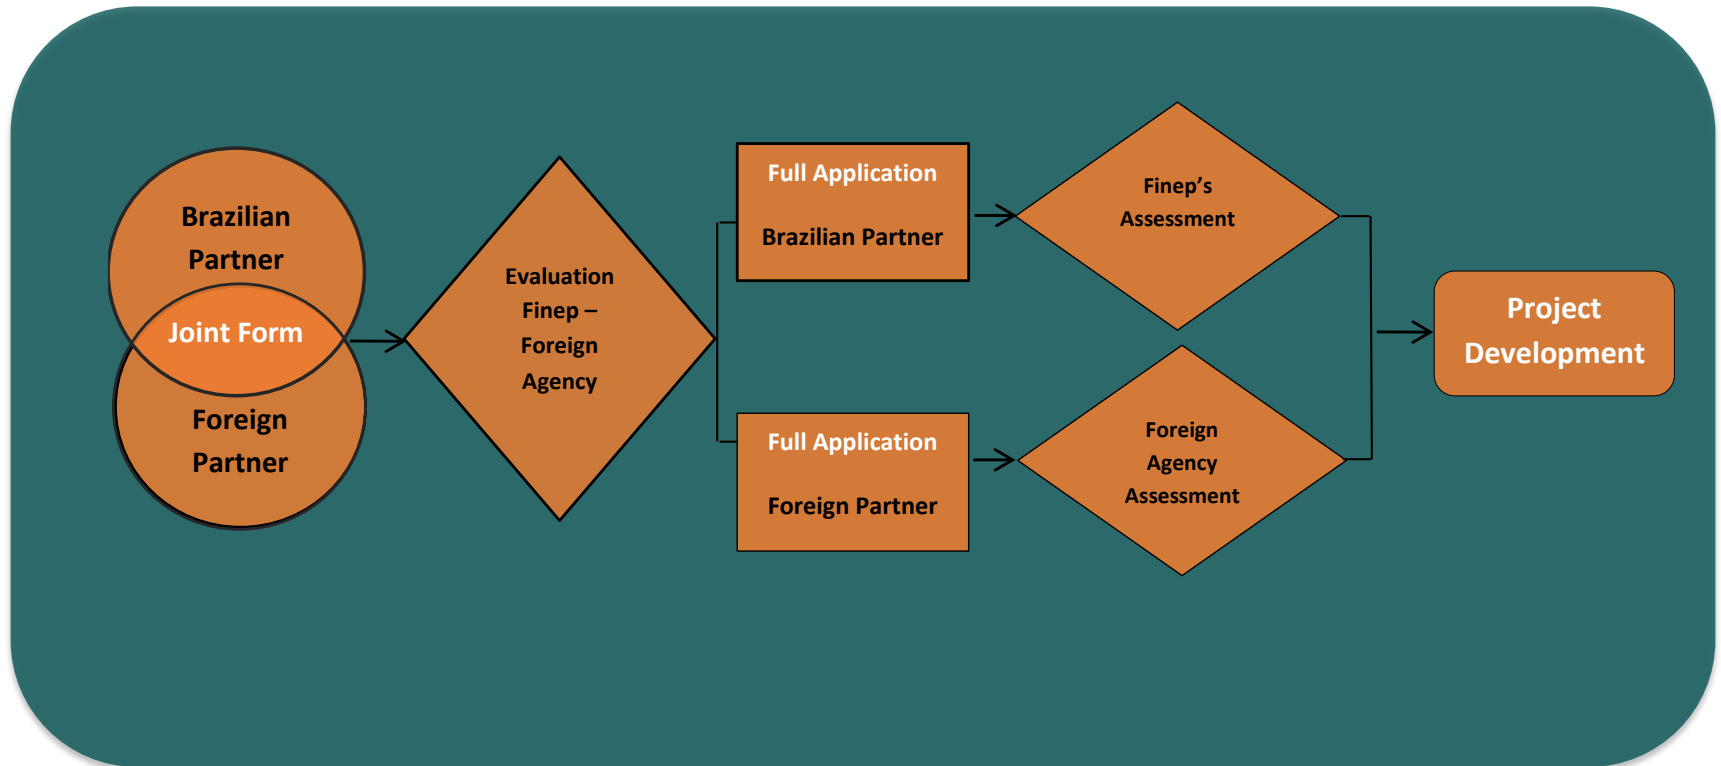

**Grants to R&D Institutions**

**Grants to Companies**

**Investment in Funds**

**Direct Investment**
