Consulting Services in Germany. And Worldwide

Agricultural Management

Training and Capacity Development for Managers and Staff

Investment consultancy, Storage, Manufacturing and Marketing of agricultural products

Technical advice in Livestock and agricultural production

Counselling for producer organizations, breeding associations, agrobusiness, authorities and NGOs

DINAK
Deutsches Institut für
Nachhaltige Agrarkultur

Joint Initiative from BMEL & MAPA. Memorandum of Understanding

Goal: Better Mutual Understanding among leading stakeholders and policy-makers in Germany and Brazil about relevant issues concerning agricultural, livestock and environmental policies

Time Frame: 2021 – 2024 (next phase: until 2027)

Stakeholders and Ambition:

- Leaders and specialists from **Governments, Agrobusiness, Science, Civil Society**
- The Agricultural Policy Dialogue is about sound agricultural and environmental policies and how to tackle with climate change at scale – in both countries.

**Public Policies for
Sustainable value
chains and low
Carbon Agriculture**
i.e. Soy ...

BMEL, MAPA. ABAG, Coalizão Brasil, EMBRAPA, Uni Bonn, IMAFLORA, Thünen-Institut, Insper AgroGlobal, UnB, NGOs, Bayer, Fraunhofer, Uni Hamburg, AHK, Dt. Bauernverband, German Agrobusiness

**Innovative Finance
for a sustainable
Agriculture**
Regulation, PES

BMEL, MAPA. IPAM, Central Bank Brazil, Coalizão Brasil, EMBRAPA, Rentenbank, Uni Hohenheim, Thünen-Institut, DAFA

BioEconomy
Decarbonizing the
Economy, sustainable
Innovation in Agriculture
and Livestock

BMEL, MAPA. Universidade Bonn, FGV Agro, Fraunhofer, DWIH, ABAG, Embrapa, Coalizão Brasil, UnB, Agrobusiness, DBFZ, Uni Hohenheim...

What we have learnt so far

- 1. Germany's and Brazil's agri-food sectors face different sustainability challenges**
Extensification vs intensification. Respect both dynamics / Potential to learn from each other.
- 2. Brazilian Agriculture is much better than its reputation abroad**
Brazil as a future agro-environmental Powerhouse. But it's not only about "reputation"
- 3. Global interest** in the agri-technological progress and in joint **BioEconomy initiatives** in Brazil, as well as continued dialogue and cooperation with Brazil. Illegal **Deforestation** must be stopped.
- 4. Bioeconomy** is a powerful instrument to drive innovation / technological change and an engine to De-Carbonize World Economy. Brazil will be key by any means.

Bio-Economy and the APD

1. Bioeconomy in Germany and in Brazil
2. Exchange Tour: Carbon Farming and Carbon Markets
3. Example: **Bio-Inputs in Agriculture** / Decarbonization / Potential for scientific Exchange and cooperation
4. Complementarity of the APD
